Adam Rimmer joined Reddie & Grose in September 2017 after graduating from the University of Bristol with a Master's degree in Chemistry with Industrial Experience. He handles patent work primarily in the chemical and pharmaceutical fields.

Adam spent his year in industry at Merck working on the development of a novel liquid crystal display mode, culminating in him being named as co-inventor on a patent application. During his final year project, he was involved in the successful incorporation of a membrane gating procedure into an artificial cellular model.

Outside of work, Adam is an avid sportsman, with a particular love for rugby, football and fishing. He is also a keen traveller, having spent the summer before he started work exploring China.

Qualifications

- European Patent Attorney (2021)
- MSci Chemistry with Industrial Experience, University of Bristol
